

# Rapid Column Arms

**A pair of linked column support arms, which simplify and speed up the erection and relocation of column formwork.**

Easy fixing and stripping of the 'column box' as a quick release mechanism allows rapid installation and striking by undoing 6 wing nuts

# Rapid Column Arms

| Product description  | Rapid Column Arm (steel beam)  |
|----------------------|--|
| Beam lengths         | 0.90 m   1.30 m  |
| Connecting system    | Closed end: 4 Clevis pins<br>Open end: standard tie rod through dedicated bracket                    |
| Vertical walers      | S150 DU-AL aluminium beams   |
| Structural           | Suitable for flat slabs, and beam and slab structures  |
| Construction         | Steel  |
| Corrosion protection | Paint finish   |
| Support/Alignment    | Standard props or support beams  |
| Lifting              | Integrated lifting bracket   |
| Column size range    | With 0.90 m arm   20 cm x 20 cm – 60 cm x 60 cm<br>With 1.30 m arm   65 cm x 65 cm – 100 cm x 100 cm |
| Column shapes        | Square or rectangular up to 2.0 m  |
| Special features     | Column forms can be moved in just two parts  |

## Product advantages

1 A robust, steel system that maintains set configuration when struck

2 Compatible with standard formwork and support components

3 Allows column forms to be moved in just two parts

4 Easy to handle, high strength to weight ratio

5 Provides additional stability for the alignment of the column shutter
