

Wall formwork

RASTO[®]-TAKKO[®]

RASTO-TAKKO is a versatile and crane-independent panel formwork, which offers an ideal solution for small and mid-size projects, especially in residential construction.

The ideal formwork for smaller and medium-size projects, particularly in the housing sector. Both light and strong. Panels can be transferred manually or by crane.

Wall formwork

RASTO®-TAKKO®

Product description	Versatile panel formwork system
Panel widths	30 45 50 55 60 65 75 90 240 cm
Panel heights	120 150 270 300 cm
Multi-purpose panel	70 x 150 70 x 270 70 x 300 cm
Profile thickness	12 cm steel frame profile
Form lining	Plywood (min. 280 g/m ² coating) ECOPLY full plastic
Lining thickness (coating)	Plywood = 14 mm ECOPLY Q = 15 mm
Average weight	40 to 65 kg/m ² (including connection parts)
Max. concrete pressure	60 kN/m ² (line 6)
Corrosion protection	Fully galvanized steel frame and connection elements
Relevant DIN-norms	Complies with DIN 18202 DIN 18218
Standard connection	RASTO aligning clamp (aligned and flush connection)
Special connection	RASTO adjustable clamp Outer corner clamp
Inner corners	30/30 cm (with 2° play for easing)
Hinged corners	From 60° to max. 150° angles
Outer corners	Basic panel with outer corner clamps
Assembly/Stripping times	t = 0.4 – 0.6 h/m ²
Special features	<ul style="list-style-type: none"> ● XXL panel 240 x 270 cm ● RASTO shaft corner adapter Panel clamp ● High quality form lining on all panels ● Extensive accessory parts program

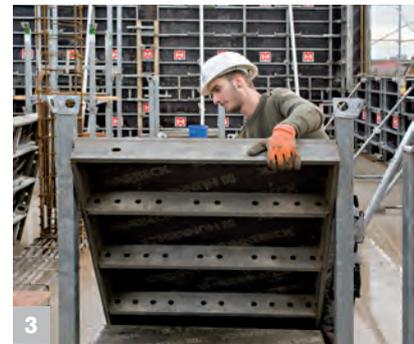

Product advantages

1 Highly versatile wall formwork system with the same connection elements for every project size

2 RASTO aligning clamps provide a strong, tight and flush panel connection in only 1 working step

3 Crane-less forming possible due to low weight of basic RASTO and TAKKO panels

4 Swift handling as well as an ergonomic manual transfer due to integrated grip holes

5 Longer service life due to the robust, galvanized steel frame profile with 12 cm thickness
