

Lightshore®

LIGHTSHORE® is a lightweight aluminum shoring system with a high load capacity of up to 110 kN

Limited basic components for easy assembly and flexibility, for use in table forms, bridge decks, high level beams and slabs, tunnels and dead shoring

Lightshore®

Product description

Lightshore	
Outer leg	1100 2200 3300 4400mm
Inner leg	1072 1680mm
Ledger frame	1200 1800 2400 3000mm
Application	Table forms Bridge decks High level beams and slabs Tunnels Dead shoring
Material	Aluminum
Movement	Special caster wheel Lifting by crane

Product advantages

1 Only 3 main components in lightweight aluminum design for ease of use

2 High load capacity of up to 110 kN

3 Quick and accurate slot-in fixing at top of frames - positioning into pockets on legs

4 Unique rotating wedge connector for high rigidity and visible locking at base

5 Full range of components and accessories for maximum flexibility

6 Frames can be placed up to 2.5m above slab level without ladders or steps giving greater speed and safety

6 Frames slot into pockets on legs allowing quick, accurate positioning
